

SAFETY

REFERENCE: EAH-LP-P0

HARNESS WITH 4 POINTS CONNECTION.

Description

H model certified standard harness with 4 rings. Multipurpose.

Weight: 1456a

General Information

The harness is part of the Personal Fall Protection System and its use is recommended when carrying out work at heights. (according to requirements established by Colombian Government law, resolucion 1409 de 2012).

-Its main function is to correctly distribute the force produced by the braking impact and allow the user to be suspended vertically. With an angle of inclination about 30°.

This harness should be supplemented with positioning lanyard ref. 50-20 and ref. 50-21 (adjustable) or energy absorber system lanyard ref. 50-22 (in webbing) or any lanyard with similar features. In case of descent and ascent activities it is recommended to use Y-Lanyards with energy absorbing system as 50-23R (in webbing or rope) or lifeline with fall arrester.

Certification

ANSI/ASSE Z359.11-2014

Graduation Buckle

Lanyard Carrier

NTC 2037- 2010

Impact Indicator

Dorsal Ring

Label indicating whether the equipment has been subjected to freefall. If the tag is activated, the equipment must be taken out of service.

Metal ring located in the harness back. This ring must be connected to an energy absorbing lanyard

and the maximum arresting force must not exceed 8kN (8000

pounds) or it should include a restriction lanyard to limit the

user's displacement.

Pectoral D Ring (limited falls)

Ring located in pectoral zone of the harness to carry out rescue, controlled ascent and descent and limited fall arrest activities.

Ring Bushing

Connections Buckles

Connection point for the free arm of the sling **Product Label** Positioning Rings Metal rings located in the side areas of the harness to support the user's weight when their activities are performed at heights with hands free.

IMPORTANT:

This element must not be used as implement for extreme sports with freefall.

Fecha de elaboración: 10/05/2018

Technical Features

- 100% polyester webbing with resistance to friction and abrasion.
- Includes label with product information and blank spaces to inspection.
- Label for custom marking with name and RH.
- Seam made of high resistance polyester thread.
- Metal rings with tropicalized protection.
- Includes adjusting buckles to hold the spare webbing.
- Manufactured in 45mm wide webbing.
- Webbing and seams for easy inspection.
- Integrated impact indicator.
- Includes lanyard carrier.
- This equipment meets requirements of ANSI/ASSE Z359.11-2014 and NTC 2037-2010.

Applications:

- Fall Arrest
- Movement Restriction
- Positioning on structures and poles
- Limited fall arrest 30cm
- To be used at:

(dorsal ring) (dorsal ring) (lateral rings)

(pectoral ring)

Mining, Industry, Installations Construction Cabling Outside Cleaning

Lab tests

TEST	NORM	REQUIREMENTS	TEST RESULTS	FULFILLS	
Static Resistance (To test dorsal, frontal, pectoral and lateral	ANSI Z359.11-2014	It must to endure a 16kN load in each of the connection points (rings) during a minute without breaking, fraying or release the torso. The slip on the adjustable buckles must not be higher than 25mm.		YES	
connection points)I			nor release of the torso.		
			There's no slip of adjustable buckles.		
Dynamic Performance (Simulating standing fall to test dorsal, frontal and pectoral connection points)	ANSI Z359.11-2014	The harness is dropped from a height which must generated n impact force greater than 16kN. At the fall moment the harness must hold the torso at less 5 minutes. For falls with the dorsal ring, the angle of repose must be less than 30° and for fall with the pectoral rings, this angle most be less than 50°. The harness stretch		YES	
			The angle of repose is: Dorsal: Between 8 ^a and 29 ^a Pectoral:		
			The harness stretch is in the range of 50-250mm.		
		must be less than 457mm.	The harness held the torso more than 5 minutes.		
Dynamic Performance (Simulating a head fall to test only dorsal connection point)	ANSI Z359.11-2014	The harness is dropped from a height which allows a head fall with an impact force more than 16kN. At the fall moment, the harness must hold the torso at less 5 minutes and the angle of repose must be less than 30°.		YES	
			The angle of repose is between 8 ^a and 29 ^a		
			The harness held the torso more than 5 minutes.		
Fall Indicator Test	ANSI Z359.11-2014	The harness is dropped from a height which allows a fall of 610mm. An energy absorber certified with ANSI Z359.13-2013 norm must be used and has to activated at the moment of the fall.	0,	YES	
Static Resistance (To test only dorsal connection point)	NTC 2037-2010	It must to endure a 22,2kN load in the dorsal connection point during a minute without breaking, fraying or release the torso. The slip on the adjustable buckles	22kN load was applied.		
			There's no breaking, fraying nor release of the torso.	YES	
		must not be higher than 25mm.	There's no slip of adjustable buckles.		
Dynamic Performance (Simulating a head and		The harness is dropped from a height which allows a fall of 1M. At the fall moment, the harness must hold the torso at less 5 minutes and the angle of repose must be less than 30°.	The harness held the torso. more than 5 minutes.	YES	
standing fall to test only dorsal connection point)			The torso was not released by the harness.		
			The angle of repose is: Head fall: Between 9 ^a and 10 ^a Standing fall: Between 8 ^a and 19 ^a		

IMPORTANT:

The service life of this product is given by the use, care, maintenance and proper storage.

Warnings

- -The service life of this product is given by the use, care, maintenance and proper storage.
- -Service life timeline starts at the moment the harness is subjected to first use. It should not be used manufacturing time to determine service time.
- -It must be to follow instructions included within the harness at the moment it is dispatched.
- -Before using this product, make a correct calculation of the requirements needed (height, activity, kind of work) to be sure the product is suitable.
- -Do not alter the product.
- -This product is not electricity, flame or chemical resistant, therefore take the necessary precautions for use in environments that have these sources of risk.
- -This product offers limited protection in highly corrosive environments, therefore take the necessary precautions to protect the product and prolong its service life.
- -This product has not sunlight protection so avoid long sun exposure which could cause discoloration on the product. Take the necessary precautions to protect the product and prolong its service life.
- -The user must be trained to use this equipment; therefore, they must meet the training requirements established by Colombian Government law (resolucion 1409 de 2012).
- -This equipment must be inspected once a year by qualified personal according EPI S.A.S. inspection standard.

Warranty Policies

- -This product is certified under quality standards ANSI Z359. 11-2014 and NCT 2037-2010
- -Warranty applies ONLY before first use due to manufacturing defects or defects of any of its parts.
- -As manufacturing defects: Fraying in ropes or seams, rips, damaged plastic buckles, missing parts.

The product will be not accepted if presents:

- -webbing with paint contamination or it is frayed by external elements.
- -The seams show wear.
- -Lack of any of the labels due to being torn off or illegibility of them by use.
- -Damage on metal parts such as breaks, sharp edges, deformation, corrosion, chemical attack, alteration and abusive use.
- -Damage on webbing produced by knots, excessive elongation, chemical attack, sulfation, excessive dirt, abrasion, alteration, excessive lubrication and abusive use.
- -Alteration, Absence of parts, evidence of damage due to improperly performed functions, or by mechanical devices and connectors.

Note:

- -It is important to read all the information included in the instruction guide before using any product.
- -The company is not responsible for any product that has been repaired outside its facilities.
- -Exchange of products due to low rotation is not accepted.

IMPORTANT:

Service life timeline starts at the moment the harness is subjected to first use.
